Manage-  
ment of  
races.

6. All Races, and all Yachts sailing therein, shall be under the direction of the Sailing Committee of the Club. All matters shall be subject to their approval and control; and all doubts, questions, and disputes which may arise, shall be subject to their decision. Their decisions shall be based upon these Rules so far as they will apply, but as no rules can be devised capable of meeting every incident and accident of sailing, the Sailing Committee should keep in view

the ordinary customs of the sea, and discourage all attempts to win a race by other means than fair sailing and superior speed and skill. The decisions of the Sailing Committee shall be final. No member of the Sailing Committee shall take part in the decision of any disputed question in which he is directly interested. The Sailing Committee shall award the prizes, subject to Rule 34. If any Yacht be disqualified, the next in order shall be awarded the prize.

Postpone-  
ment of  
races.

8. The tonnage of every Yacht entered to sail in a Race shall be ascertained in the manner following : the length shall be taken in a straight line at the deck, from the fore-part of the stem to the after-part of the stern-post; from which deducting the breadth, the remainder shall be esteemed the length to find the tonnage; the breadth shall be taken from outside to outside of the planking, in the broadest part of the Yacht, and no allowance shall be made for wales, doubling planks, or mouldings of any kind; then multiplying the length by the breadth, and the product by half the breadth, and dividing the result by 94, the quotient shall be deemed the true tonnage; provided always that if any part of the stem or stern-post, or other part of the vessel at or below the load water-line project beyond the length taken as above-mentioned, such projection or projections shall, for the purposes of finding the tonnage, be added to the length taken as stated. In the case of a Yacht whose stern-post has an elbow, the length shall be taken to a point where the stern-post, if its rake were continued, would cut the deck-line; and in measuring Schooners or other Yachts with overhanging stems, the length shall be taken to a point half the distance between the fore part of the stem at the deck-line and a perpendicular to the true load water-line at its fore end. Any fraction of a ton above one half shall count as a ton. If, from any peculiarity in the con-

Measure-  
ment for  
tonnage.

struction of a Yacht, or other cause, the measurer shall be of opinion that this rule will not measure the Yacht fairly, he shall report the circumstances to the Sailing Committee, who, after making such inquiries as they consider necessary, shall award a certificate of tonnage accordingly. The certificate of tonnage of the Royal Canadian Yacht Club shall be deemed a Yacht's true racing tonnage, so long as she remains unaltered.

Time allow-  
ance

9. Time shall be allowed on arrival for difference in tonnage, according to the annexed scale, increased or decreased in proportion to the length of different courses.

Entries.

10. Entries shall be made with the Secretary of the Club at least 24 hours previous to noon of the day appointed for starting each Race. In case of a Sunday intervening, 24 hours shall be added. 17. There shall be no limit as to the number of paid hands, and no restrictions as to the number of friends or to their working. No one shall join or leave a Yacht after the signal to start.

Fittings and ballast.

18. All Yachts exceeding ten tons shall be fitted below deck with the ordinary fittings of a Yacht, and their platforms shall be kept down, and bulkheads standing. No more than the usual anchors and chains shall be carried during a Race, which must not be used as shifting ballast, or for altering the trim of the Yacht. ~~No bags of shot shall be on board, and~~ all ballast shall be properly stowed under the platform or in lockers, and shall not be shifted or trimmed in any way whatever during a Race. No ballast shall be shipped or unshipped after 9 p.m. of the day previous to the Race. A Race re-sailed shall, so far as regards this rule, be considered a new Race. This rule does not apply to second-class Yachts.

Boats and life-buoys.

19. Every Yacht exceeding thirty tons, shall carry a boat on deck, not less than eight feet in length and three feet beam, with oars lashed in it, ready for immediate use. Every Yacht shall carry at least one life buoy on deck ready for use.

20. The Yachts shall start from moorings, anchors, <sup>Starting.</sup> or under way, as directed by the Sailing Committee. Half-an-hour before the time of starting a gun shall be fired and a flag hoisted, as a signal for the Yachts of each successive Race; in case of a start from anchors or moorings, to take up their stations for the start with headsails down, or all sails down, as the Sailing Committee may direct; or in case the start be a flying one, to approach the starting line.

Five minutes before the start a preparative gun shall be fired. At the expiration of five minutes *exactly* the Flag shall be hauled down, and a third gun fired as a signal to start. If the start is to be made from anchors or moorings, lots shall be drawn for stations, and springs shall be allowed on the same bridle or anchor chain or warp as the bowfasts, but are not to be carried to a buoy, pier, other vessel, or fixed object. If any Yacht lets go or parts her bridle before the signal to start, or if she drags any moorings or anchor to which she is made fast for the purpose of starting, she shall be liable to be disqualified, unless such parting or dragging be explained to the satisfaction of the Committee, or unless she has returned, after the signal to start, within the line of starting buoys, so as not to obtain any advantage by the accident. In a flying start, if any Yacht, or any part of her hull or spars be on, or cross the line before the signal to start is made, she must return and re-cross the line; a Yacht so returning, or one working into position from the wrong side of the line after the signal to start has been made, must keep clear of all competing Yachts. Should the gun miss fire, the lowering of the flag should be the signal to start.

21. If two Yachts are meeting end on, or nearly <sup>Meeting end on.</sup> end on, so as to involve risk of collision, the helms of both shall be put to port, so that each may pass on the port side of the other.

22. When two Yachts are crossing so as to involve <sup>Two Yachts crossing.</sup>

risk of collision, then if they have the wind on different sides, the Yacht with the wind on the port side shall keep out of the way of the Yacht with the wind on the starboard side, except in the case in which the Yacht with the wind on the port side is close hauled and the other Yacht free, in which case the latter Yacht shall keep out of the way; but if they have the wind on the same side, or if one of them has the wind aft, then the Yacht which is to windward, shall keep out of the way of the Yacht which is leeward.

Overtaking,  
rounding,  
marks, etc.

23. A Yacht overtaking another Yacht shall keep out of the way of the last mentioned Yacht, but when rounding any buoy or vessel used to mark out the course, if two Yachts are not clear of each other at the time of the leading Yacht is close to, and actually rounding the mark, the outside Yacht must give the other room to pass clear of it, whether it be the lee or weather Yacht which is in danger of fouling the mark. No Yacht shall be considered clear of another Yacht, unless so much ahead as to give a free choice to the other on which side she will pass. An overtaking Yacht shall not, however, be justified in attempting to establish an overlap, and thus force a passage between the leading Yacht and the mark after the latter Yacht had altered her helm for the purpose of rounding.

Obstruction  
to sea room.

24. When passing a pier, shoal, rock, vessel, or other obstruction to sea-room, should Yachts not be clear of each other, the outside Yacht or Yachts must give room to the Yacht in danger of fouling such obstruction, whether she be the weather or the leeward Yacht; provided always that an overlap has been established before an obstruction is actually reached.

Luffing and  
bearing  
away.

25. A Yacht may luff as she pleases to prevent another Yacht passing to windward, but must never bear away out of her course to hinder the other passing to leeward—the lee side to be considered that on which the leading Yacht of the two carries her main

boom. The overtaking vessel, if to leeward must not luff until she has drawn clear ahead of the Yacht she has overtaken.

26. If two Yachts are standing towards a shore or shoal, or towards any buoy, boat or vessel, and the Yacht to leeward is likely to run aground or foul of such buoy, boat or vessel (a marked vessel excepted), and is not able to tack without coming into collision with the Yacht to windward, the latter shall at once tack, on being hailed to do so by the owner of the leeward Yacht, or the person acting as his representative, who shall be bound to see that his own vessel tacks at the same time.

Close  
hailed  
approaching  
shore.

27. Any Yacht running on shore, or foul of a buoy, vessel, or other obstruction, may use her own anchors, boats, warps, etc., to get off, but may not receive any assistance except from the crew of the vessel fouled. Any anchor, boat, or warp used must be taken on board again before she continues the Race.

Running  
aground, etc.

28. Each Yacht must go fairly round the course; and must not touch any buoy, boat, or vessel used to mark it out, but shall not be disqualified if wrongfully compelled to do so by another Yacht. Any Yacht causing a mark vessel to in any way shift her position to avoid being fouled by such Yacht, shall be disqualified. If a Yacht, in consequence of her neglect of any of these Rules, shall foul another Yacht, or compel other Yachts to foul, she shall forfeit all claim to the Prize, and shall pay all damages.

Fouling  
Yachts,  
marks, etc.

29. No towing, sweeping, poling, or pushing, or any mode of propulsion except sails, shall be allowed.

Means of  
propulsion.

30. Yachts may anchor during a race, but must weigh their anchor again, and not slip. No Yacht shall, during a race, make fast to any buoy, stage, or pier, or send an anchor out in a boat, except for the purpose of Rule 27.

Anchoring.

31. No other means of sounding than the lead and line allowed.

Sounding.

**Side lights.** 32. All Yachts sailing in a Race at night shall observe the statutory rule as to the carrying of side lights.

**Man overboard.** 33. In case of a man falling overboard from a competing Yacht, all other Yachts in a position to do so shall use their utmost endeavours to render assistance; and if it should appear that any Yacht was prevented thereby winning the Race, the Committee shall have power to order it to be re-sailed between any Yacht or Yachts so prevented and the actual winner.

**Protests.** 34. Should the owner of any Yacht, or the person acting as his representative, consider that he has a fair ground of complaint against another for foul sailing, or any violation of these Rules, he must, if it arise during the Race, signify the same by showing the Distinguishing Flag conspicuously in the main rigging till the conclusion of the Race. The protest shall be made in writing, and under such regulations (if any) as the Sailing Committee may have determined, within twelve hours of the arrival of the protesting Yacht, and shall be heard by the Sailing Committee and decided, after such inquiries as they may consider necessary. They shall also, without a protest, disqualify any Yacht, should it come to their knowledge that she has committed a breach of the Rules.

**Removal of flag boats.** 35. Should any flag, vessel, boat, or buoy be removed from its proper position, either by accident or design, the race shall be sailed over again, or not, at the option of the Sailing Committee.

**Penalty for disobeying rules.** 36. Any Yacht disobeying or infringing any of these Rules, which shall apply to all Yachts whether sailing in the same or different races, shall be disqualified from receiving any Prize she would otherwise have won, and her owner shall be liable for all damages arising therefrom.

Should a flagrant breach of these Rules be proved against any Yacht, her Sailing Master may be dis-

qualified by the Sailing Committee for one season from sailing in any Race held under the Rules of the Royal Canadian Yacht Club.

37. When the Yachts are ordered to sail in cruising trim, the following Rules are to be strictly observed: <sup>Cruising trim.</sup>

1. No doors, tables, cabin skylight, or other cabin or deck fittings (davits excepted), are to be removed from their places before or during a race.
2. Anchors and chains suitable to the size of the Yacht are to be carried, one at the cathead (or in Yachts of forty tons and under, at the usual place on the bow), which anchor is not to be unshackled from the chain before or during the Race.
3. Every Yacht exceeding thirty tons shall carry a boat on deck not less than eight feet in length and three feet beam.

As mixed Races are no satisfactory test of the relative speed of Yachts, the different rigs should, whenever practicable, be kept separate; but when mixed Races are unavoidable, the following rule shall be observed: <sup>Allowance to schooners and yawls.</sup>

The tonnage of Schooners and Yawls to be reckoned for time allowance as follows, viz., Schooners at three-fifths, and Yawls at four-fifths of their actual tonnage; provided that in case of a Yawl, her main boom, when in its place and parallel to the deck, does not extend more than one-fifth her extreme beam abaft the aft side of her stern-post on deck. In calculating the deduction for difference of rig, the tonnage by certificate to the exact fraction is to be used. The time allowances to be calculated from each vessel's reduced tonnage.

Flying starts should be adopted when practicable, <sup>Flying starts.</sup> but no time should be allowed for delay in starting.

Classifica-  
tion.

The classification of Yachts should, when practicable, be as follows :—

1st class—above ten tons upwards.

2nd class—five tons and not exceeding ten tons.

3rd class—not exceeding five tons.

### TABLES OF TIME ALLOWANCE.

---

The principles assumed in computing these tables are the same as those adopted in the calculation of the Time Table of the Royal Yacht Squadron (1866), namely, that the allowance of time given by a larger to a small vessel should be *directly* proportional to the distance sailed, and *inversely* proportional to the size of the vessels; that is to say :

If a larger can allow a smaller vessel one minute on a particular length of course, she can allow her two minutes on a course of twice the length.

And with respect to the element of size, the assumption is, that if a vessel of, say 50 tons, can allow a smaller one any given time per ton of difference, a vessel twice the size, or 100 tons, can only allow half the time, or the same for two tons that the vessel of 50 tons allows for one ton.

The allowance of time for each ton will consequently be obtained from the relation

$$t = \frac{kl}{T}$$

where  $t$  is the allowance of time per ton in seconds,  $k$  a number, whose value in the table is taken as 30, on the supposition that a vessel of 30 tons can allow one of 29 tons one second per mile,  $l$  the length of the course in miles, and  $T$  the tonnage of the vessel.

For a course of 50 miles the formula therefore is

$$t = \frac{30 + 50}{T}$$

The time scales have been computed for courses of 50, 10, and 8 nautical miles. These scales have been adopted, because from them the time allowance for almost any length of course can easily be calculated. For example, the time allowance for a course of 16 miles will be double the 8-mile scale; the time allowance for a course of 30 miles will be three times the 10-mile scale; the time allowance for a course of 25 miles will be half the 50-mile scale; and in like manner the time allowance for any other length of course may be readily ascertained.

In the 50-mile scale any number involving a fractional part of a second is represented in the tables by the nearest whole number, that is:

At 40 tons the true No. is 49m. 52-81s.; it is set down as 49m. 53s. At 41 tons the true No. is 50m. 29-39s.; it is set down as 50m. 29s. This of necessity involves an error, which, however, cannot exceed a second as between any two Yachts.

But in the 10 and 8-mile scales, it has been necessary, for the sake of accuracy, to give fractional parts of a second.

In the time allowance worked out from the tables, for any given length of course, fractions exceeding half a second should be counted as seconds, but fractions of half a second or under should be disregarded.

#### RULES FOR USING THE TABLES.

Take the times placed opposite to the tonnages of any two vessels; the difference between these times will be the time the larger vessel is to allow the smaller one over the length of course specified at the head of the column from which the times are taken.
